

The measured edge tracks the evaluation block, not the policy: an out-of-sample block, unanimous seeds and a small p are not sufficient

Four candidates that evaporated.
Each cleared its bar on the block it was found on.

4. An edge that was manufactured. Every arm loses on validation and wins on the sealed block — including the controls.

* independently diagnosed as behaviourally collapsed: these agents defer execution until the deadline forces it. A learner that has stopped learning cannot acquire skill, so what changed between the two periods was the market, not the policies.

first block (development, or validation for instance 4) fresh block (sealed, or reserve) ± 0.05 bps pre-registered materiality threshold
