
Agents pay for their deviation from uniform pacing without buying risk reduction
calm (5/5 agents strictly dominated)
volatile (3/5 agents strictly dominated)
mean cost (bps) [lower = cheaper]
cost standard deviation (bps) [risk]
AC κT=4
AC κT=2
AC κT=1
TWAP = AC κT=0
oracle VWAP
benchmark on the efficient frontier
benchmark off the frontier
efficient frontier
trained RL agent (one per seed)
oracle VWAP (infeasible; excluded from the frontier)
